**Salem Tube**  
INTERNATIONAL LTD

*Your Global Partner for Heat Exchanger and Boiler Tubes*

# BOILER TUBE

## INTRODUCTION

Since 1992 Salem Tube have been providing a complete service to the Petrochemical Industry worldwide.

Boiler tube has now been added to our range and we have around 600 tonnes available from stock for immediate supply.

All material is high quality and fully certified. We can supply in cut lengths of bulged / swaged depending on your requirements.

Our standard stock range starts at 38.1mm O/D (1.1/2") in both plains and stays up to 76.1mm O/D (3") and can offer deliveries throughout the UK and also worldwide.

## CUTTING SERVICE

The stock is held in both 10.2 metre and 12.25 metre lengths in the majority of the sizes. This enables us to minimise wastage where specific cut lengths are required. We can cut to an agreed tolerance and the tubes are deburred.

## BULGING AND SWAGING

We have installed new equipment which is capable of both bulging and swaging from 38.1mm to 88.9mm.

We welcome any enquiries you may have for boiler tube in any specification as we are continuing to add to our range in both welded and seamless.

## STANDARD STOCK RANGE

BOILER & PRESSURE TUBE TO EN 10217-1 P235TR2 (BS3059 STEEL 320)

OD in	Wall in/gauge	OD mm	Wall mm	Kg/m
